

# Teamwork & Collaboration

Our group consists of three members: Lin Yang (22058335), Muhamad Haziq Fuad (S2031779), and Yan Wu (22082478, amyG20). Whether in the first or second phase of the group project, the three of us collaborated closely. Throughout the process, we faced various challenges and issues such as software installation, data processing, time conflicts, suboptimal model performance, and failed uploads in SAS Enterprise Miner, requiring us to readjust our roles. However, we worked together with determination to overcome each difficulty, successfully completing our group project.

In addition to attending classes together, we held two meetings at the He&She Café to discuss our tasks. We established a WhatsApp group to facilitate work discussions and created a Teams channel for file collaboration and conducting online meetings. Each of us contributed wholeheartedly, making our group an excellent and cohesive team.

1. On October 28th, the team held its inaugural meeting for discussion at the He&She Café.

~Haziq, ~Yang Lin, 您

Great,if you succeed,could you help me to install the two software?

17:15 ✓/✓

The two softwares 17:15 ✓/✓

~ Haziq +60 12-215 9478

Yeah i try first 17:18

Thanks last week I tried several times but failed

17:24 ✓/✓

Hey,Haziq,I am in white shirt with a silk scarf and another team member sits with me in the middle of the hall (4th row).If possible we can meet and discuss the group project.Is that okay for you?

17:28 ✓/✓

I bring a yellow bag with me

17:29 ✓/✓

~ Haziq +60 12-215 9478

Yeah sure2 17:36

I'm wearing black tshirt with on the right side

17:37

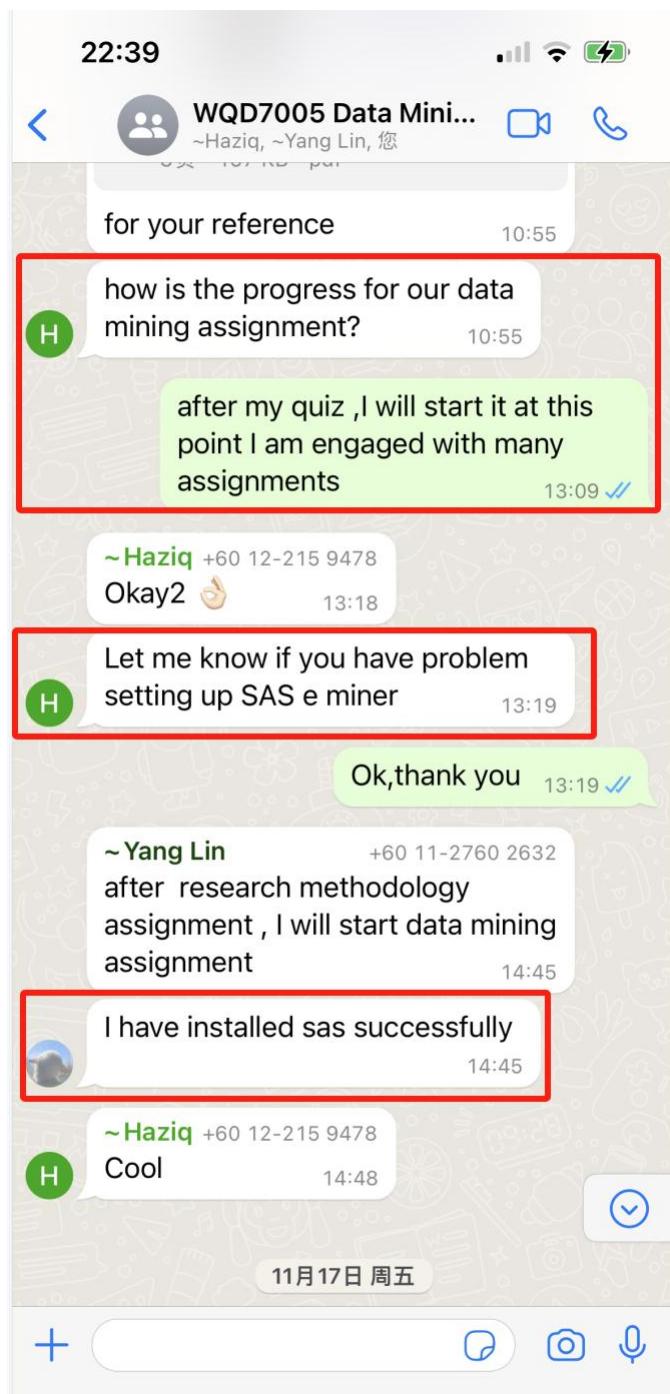

Ok

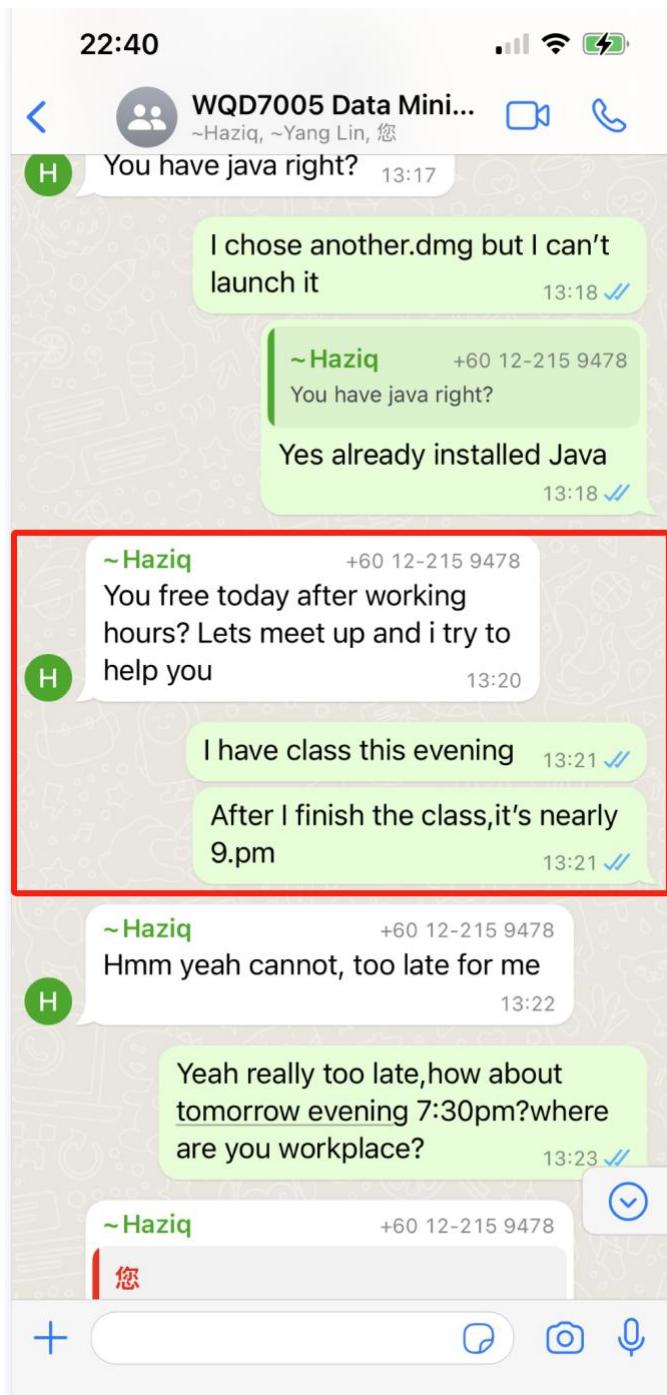

17:37 ✓/✓

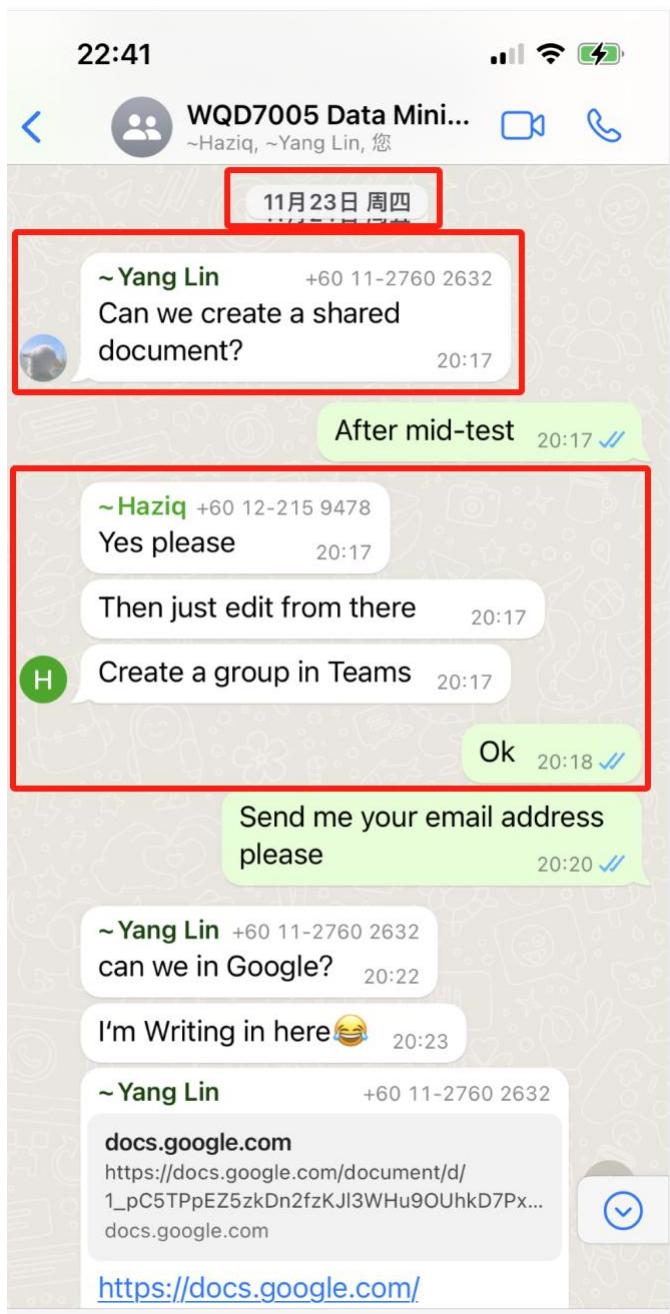

2. Started the group assignment and helped each other resolve software installation issues.

3. On November 23, created our own channel on Teams.

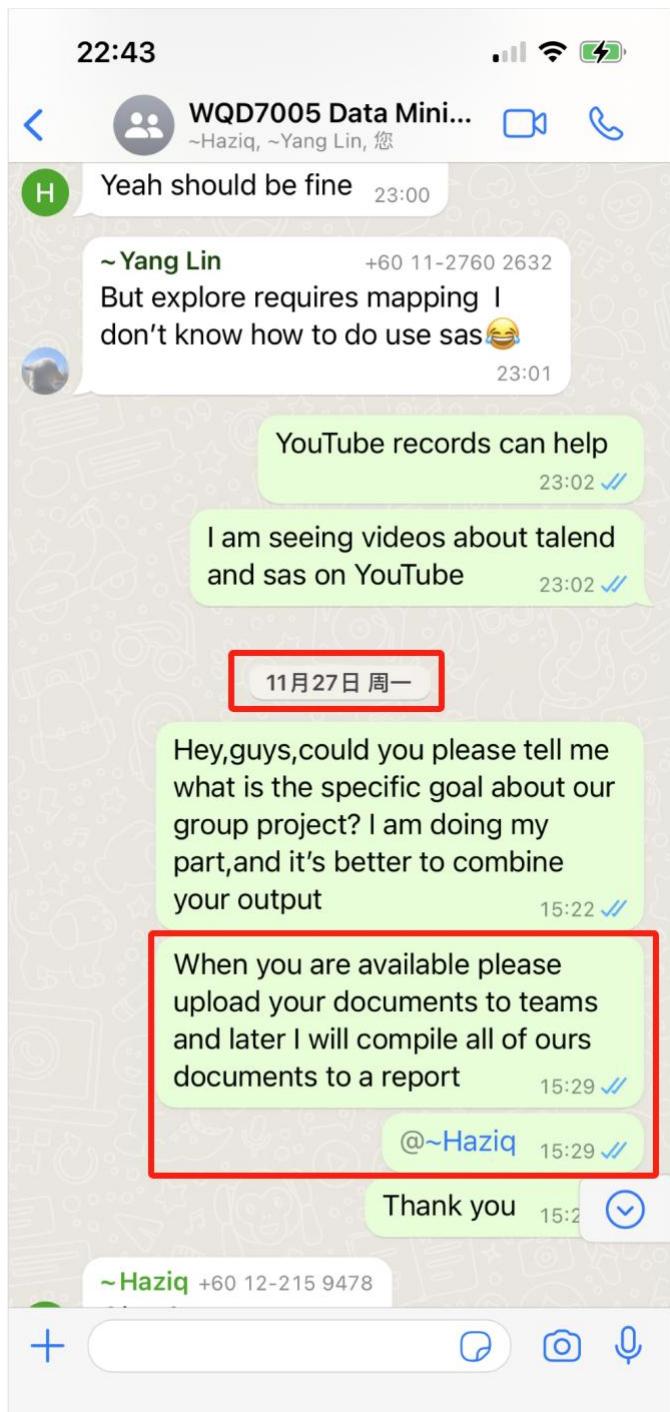

4. On November 26, discussed the tools needed to complete our group project.

5. On November 27, each team member uploaded relevant files to Teams, and then we started compiling the report.

11月30日 周四

@~Yang Lin @~Haziq good evening, I have updated my part to teams, kindly please update yours and we shall discuss our slides and records

18:21 ✓

~ Yang Lin +60 11-2760 2632  
I'll re-upload and update my section later

18:23

Okay 18:26 ✓

About our slide, do you have any slide templates to share?

20:49 ✓

~ Yang Lin +60 11-2760 2632  
I made two pages yesterday

20:57

~ Yang Lin +60 11-2760 2632  
I made two pages yesterday

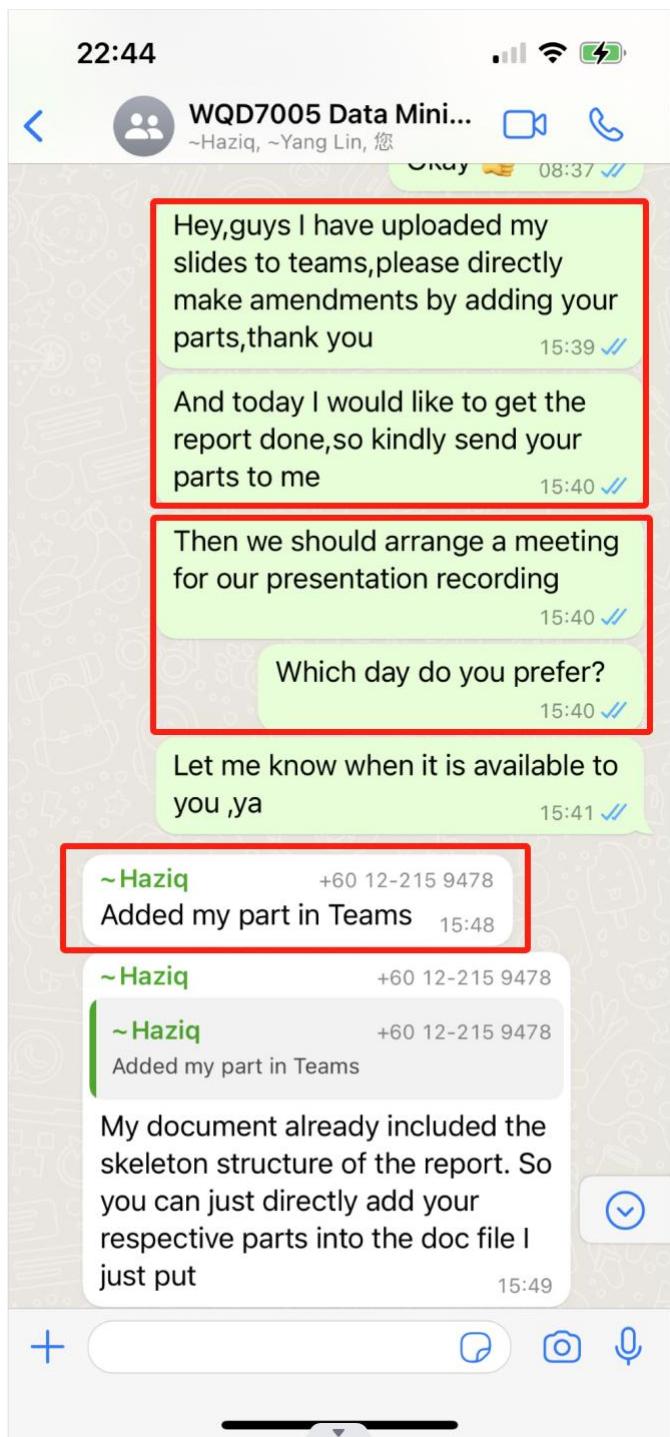

I mean we need to select a united style for our slides

21:3

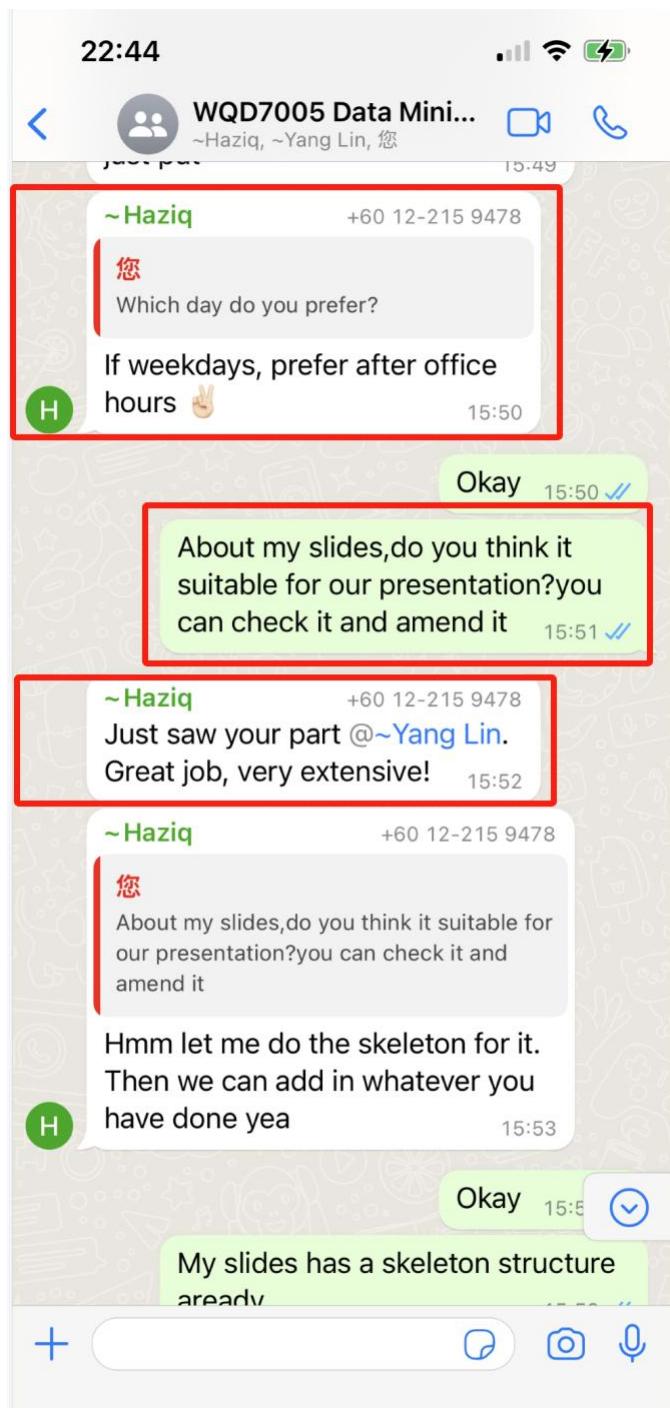

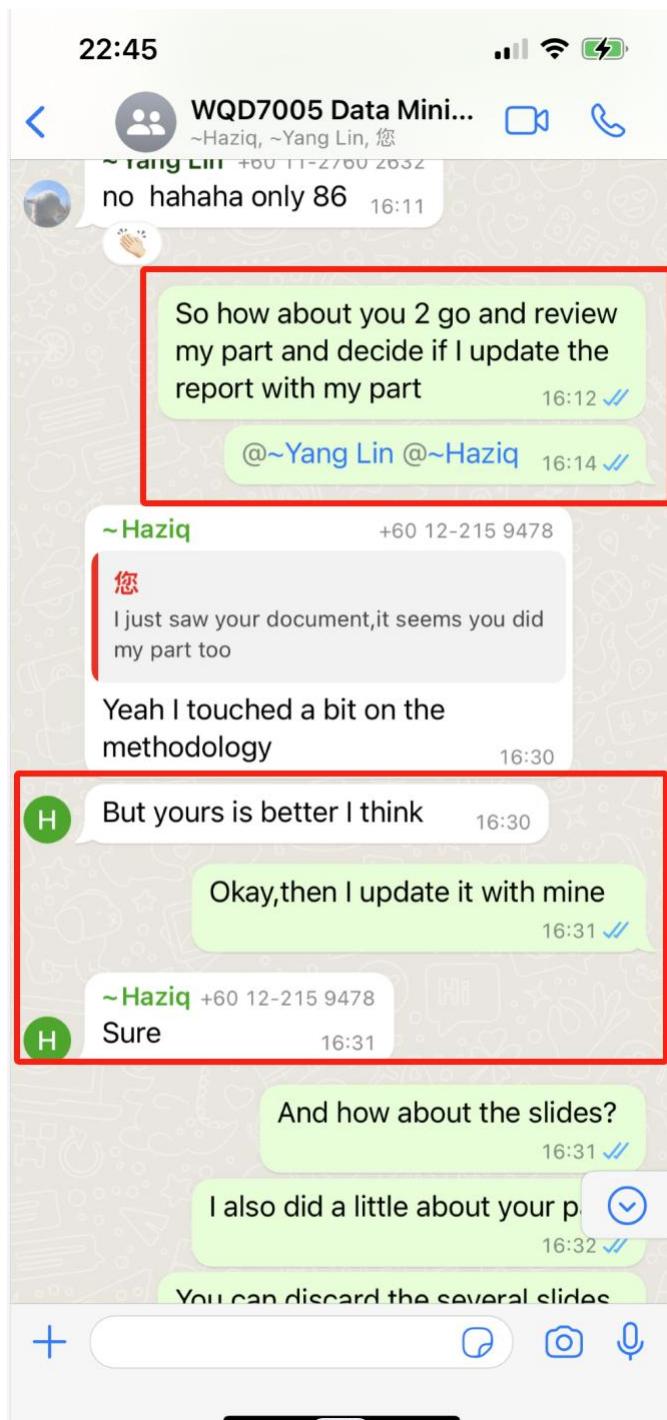

12月1日 周五

6. Started discussing the presentation issues for the assignment.

22:45

WQD7005 Data Mini...

~Haziq, ~Yang Lin, 您

Sure

16:31

And how about the slides?

16:31 ✓✓

I also did a little about your part

16:32 ✓✓

You can discard the several slides  
if you are not comfortable with that

16:32 ✓✓

~Haziq

+60 12-215 9478

您

I also did a little about your part

On the slides or report?

The screenshot shows a spreadsheet application interface. At the top, there is a toolbar with various icons. Below the toolbar, a table displays column metadata:

Intubated	whether the patient was connected to the ventilator.
ICU_Status	Indicates whether the patient had been admitted to an Intensive Care Unit.
Date_died	indicates the date of patient death.

Below the table, a large portion of the spreadsheet is visible, showing numerous rows of data. A status bar at the bottom right indicates "20:3".

At the bottom of the screen, there is a navigation bar with icons for back, forward, search, and other functions. The overall background of the app is dark.

22:46

WQD7005 Data Mini... ~Haziq, ~Yang Lin, 您

Dimension | 1,048,575 rows, 21 columns

2.2. Column Metadata

There are a total of 21 variables and their respective description in our dataset metadata. Based on the variable summary table, we have 18 binary, 1 interval, 1 nominal and 1 ordinal variables. "Date\_died" variable is chosen to be our binary target variable. Figure 2.2 below displays the metadata, while Figure 2.3 below shows the role and level of each variable alongside other related information.

Figure 2.2 Variable Summary Table

Variables	Description
Sex	Gender of the patient; male or female
Age	Age of the patient
Classification_final	covid test findings. Values 1-3 mean that the patient was diagnosed with covid in different degrees. 4 or higher means that the patient has died from covid.

Excuse me, but I can't find figure 2.3 20:38 ✓✓

Is there another table missed? @~Haziq 20:39 ✓✓

~Haziq, ~Yang Lin, 您

14:43

@~Yang Lin in the result - sample part, can you add and show where we do the sampling, say we take 10% of the whole data population

14:54

To represent our dataset

14:57

~ Yang Lin

+60 11-2760 2632

~ Haziq

+60 12-215 9478

@~Yang Lin in the result - sample part, can you add and show where we do the sampling, say we take 10% of the whole...

Yes, but maybe tomorrow. I'm still in Penang now

14:59

~ Haziq

+60 12-215 9478

The key note file right?

I transferred it to ppt

15:00 ✓

~ Haziq

+60 12-215 9478

~ Yang Lin

+60 11-2760 2632

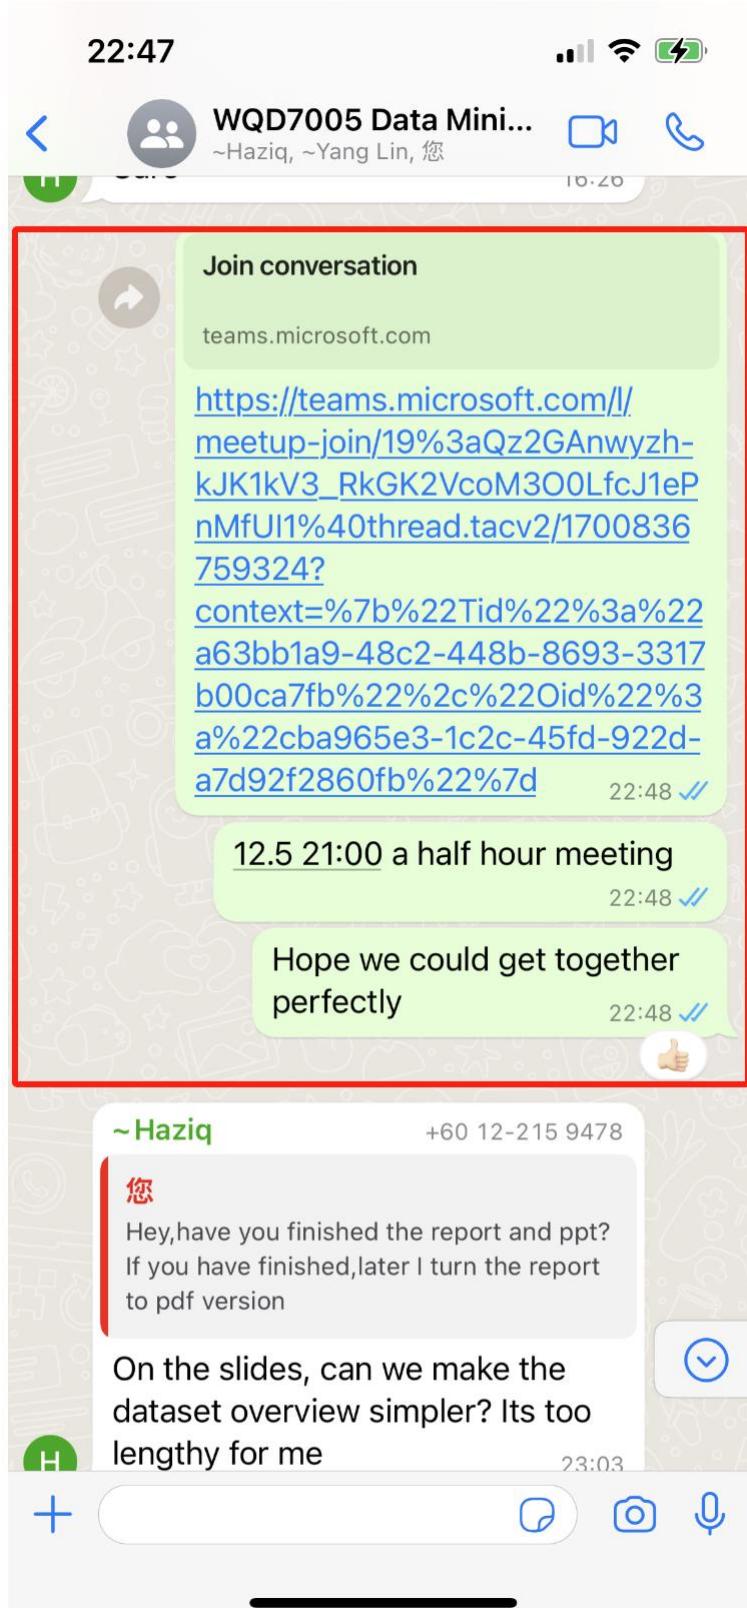

Yes, but maybe tomorrow. I'm still in Penang now

Sure2 no worries. We still have time

15:01

7. Notified to have a meeting at He&She Cafe on December 6th to discuss the tasks for the next stage.

22:48

WQD7005 Data Mini...

~Haziq, ~Yang Lin, 您

Thanks

18:06 ✓

Good evening, comrades. Before we commence with recording our video presentation, let me briefly outline tonight's agenda: Firstly, Lin Yang will be responsible for playing the slides. Before each speaker takes the stage, I'll provide a brief introduction to our project and our team. Then, I'll hand it over to Haziq to delve into his section. This way, we'll take turns presenting our respective parts, each lasting around two minutes. This allows everyone to review and address any potential issues.

20:15 ✓

Also, after finishing class this Saturday, we can go to He & She for a cup of coffee and discuss our next work arrangements. I'll treat.

20:17 ✓

~ Yang Lin

+60 11-2760 2632

Do we need to turn on the camera during recording?

20:22

Yes we need

20:22 ✓

8. Discussed resolving the issue of imbalanced distribution in our data.

22:49

WQD7005 Data Mini...

~Haziq, ~Yang Lin, 您

~Haziq

+60 12-215 9478

Later need to add target data  
imbalance checking in our explore  
part for the project

17:19

Okay 17:19 ✓✓

~ Yang Lin

+60 11-2760 2632

Okay, I'll add it when I'm sorting it  
out.

17:20

I added a column "DEATH" : 1 is  
yes, 0 is no

17:24

And I removed 97, 99 of all  
columns

17:24

Blanks are treated as missing  
values, Is this okay?

17:25

~ Yang Lin

WQD7005 Data Mini... ~Haziq, ~Yang Lin, 您

12月24日 周日

~ Yang Lin +60 11-2760 2632  
I completed the modify part and uploaded it to teams, but I don't know how to do with the target imbalance. 😭 15:47

Could you please help me check if there is anything I need to change in my part? 15:47

~ Yang Lin +60 11-2760 2632  
3.3.5 Target analysis  
Through the analysis of the sample target, we found that the results were imbalanced, the result is shown in the Figure 3.3.5.1. Therefore, we need to do oversampling or undersampling to make the target variable balance.  

I added target analysis in the explore part and mentioned this issue. 15:55

~ Haziq +60 12-215 9478  
~ Yang Lin +60 11-2760 2632  
Could you please help me check if there is anything I need to change in my part?

22:50

WQD7005 Data Mini...  
~Haziq, ~Yang Lin, 您

Btw, need to include association rule in the explore stage (based on what Dr. told in yesterdays lecture)

19:08

Plan to complete my part this week. Hope the cleaned dataset is ready as soon as possible 🙏

H

19:10

~ Yang Lin +60 11-2760 2632  
our dataset also need to add the association rule?

19:10

~ Haziq +60 12-215 9478  
I think so. That is what dr. mentioned. But i really dont have any idea how to do so

19:15

We can put that as least priority for now, to save time

19:16

When we finish 1st draft of the report, then we try to do that

19:17

H

~ Yang Lin +60 11-2760 2632  
our dataset also need to add the association rule?

Can ask dr on the teams

+60 11-2760 2632

数据=SAMPLE

变量	数值型值	格式化值	频数计数	百分比	标签
DEATH	0	0	50000	50	
DEATH	1	1	50000	50	

that's mean the target is balance,  
right?

20:21

~Haziq +60 12-215 9478

Yupp 20:50

I assume so 20:50

Bcos its in chinese 😊 20:50

~ Yang Lin +60 11-2760 2632

haha 20:52

I selected two languages when  
downloading, so when I opened it,  
the default was Chinese. 20:52

~Haziq +60 12-215 9478

Should be ok 20:55

Percentile 50 ,50

20:55

Balance

20:56

9. Keeping track of the progress of the group project at all times.

12月30日 周六

Good morning, everyone!  
Regarding our group assignment, I need to build upon what you have done. Could you please update me on your progress? I've reviewed the SAS Enterprise Miner workflow. As the final step, do I need to replicate all the work you've done so far, or can I continue directly from where you left off? Should I proceed with my tasks based on the steps you've completed, or is it necessary for me to redo everything once you've finished? Also, do you upload the SAS files directly after completion? Thanks!

11:19 ✓

Besides ,what is the third tool we need to use for our case study next week? I did not hear clearly last time the prof assigned the task

~Haziq, ~Yang Lin, 您

I have done with the modeling part.  
But it seems like the result is not  
quite good.

01:09

The clean and modified dataset is  
named as covid\_missingvalues.csv  
is it? @~Yang Lin

01:09

The target variable looks good. But  
the other variables seem to have  
missing values. Can you help to  
impute it? @~Yang Lin

01:10

Or should I just ignore those  
variables with missing values,  
since the missing data points are  
too much?

01:24

I can't find the imputed columns in  
the csv file

01:27

Please help later ya, thankss

H 01:27

### Assignment G1

Dear DR TEH YING WAH,

I hope this message finds you well. I am YaoHong, I'm part of a group that uses "emoji", a student in your WQD7005G1 class. Firstly, I would like to express my sincere apologies for our group's failure to meet the standards set for the recent assignment. We fully acknowledge that our initial submission(Group Assignment - G1) did not meet your expectations, and we have accepted the initial grade assigned.

However, following the receipt of our grade, our group immediately took action to thoroughly revise and improve our project. We have addressed the issues present in our original submission and have added additional content and analysis to ensure that it meets the course requirements and your expectations.

As such, we are respectfully requesting that you reconsider and reevaluate our revised submission. We understand that this may require additional time and effort on your part, and we believe that our improved work will more accurately reflect our learning and
